The customer must be 62 years of age or older, be totally blind, totally physically disabled or mentally disabled.

The customer shall have cable service in his or her name, have the address which is listed on the application as his/her legal residence, and be a customer of the city.

The customer's total gross annual income should not exceed the following amounts.

\$8,000.00 for a single person

\$10,032 for a family of two

\$12,600 for a family of three

\$15,156 for a family of four or more

Applicants who meet the above three provisions will qualify for a discount of 5% of the basic charge for cable service. The applicant's age must be verified by identification. Physically and mentally disabled applicants will be verified by Social Security Administration. Income and retirement benefits will be verified by requiring applicants to provide a copy of their previous year's state or federal tax forms. The City Manager has final review of all applications. Applications are available at City Hall.

Completed application should be returned to the Compas office at City Hall.

**Criteria for qualifications for rate: The City of Morganton offers an electric rate to low - income senior citizens and disabled persons who meet certain provisions:**

- (1) The customer must be 62 years of age or older or be totally blind or totally physically or mentally disabled.
- (2) The customer shall have the electric service in his/her name, have the address which is listed on the application as his/her legal residence and be a customer of the city.
- (3) The customer's total gross annual income and retirements benefits, including the total gross annual income and retirement benefits of those who live in the applicant's residence, shall not exceed:

\$ 10,210 for a single person	\$ 24,130 for a family of five
\$ 13,690 for a family of two	\$ 27,610 for a family of six
\$ 17,170 for a family of three	\$ 31,090 for a family of seven
\$ 20,650 for a family of four	\$ 34,570 for a family of eight

Applicants who meet the above three provisions will qualify for the rate; current rates are available by calling a customer service representative at 438-5250.

The applicant's age must be verified by identification. Physically and mentally disabled applicants will be verified by the Social Security Administration. Income and retirement benefits will be verified by requiring applicants to provide a copy of their previous year's state or federal tax forms.

The City Manager has the final review of all applications and will notify all applicants of their status within 30 days of receiving the application.

Applications are available in City Hall Monday - Friday 8 am - 5 p.m. Completed applications should be returned to the customer service office at City Hall.

**CITY OF MORGANTON  
 AVOIDED COST CREDIT FOR RENEWABLE ENERGY GENERATION  
 RIDER RE2**

AVAILABILITY

This rider is available only to new **renewable energy generation** as described below, commissioned and completely installed on and after **July 1, 2013**. This rider shall remain effective until modified by City Council.

APPLICABILITY

The Avoided Cost Credit for Renewable Energy Generation set forth in this rider is applicable to Renewable Energy Generation, Type 4 REG, as those terms are defined in Power Agency's Policy Regarding Generation on Participant Distribution Systems, dated December 1, 2009.

AVOIDED COST CREDIT RATE

A cost credit rate will be applied in each month to each Type 4 REG, as measured in kWh for such month, in accordance with the following:

Type of Rate

- For each Customer with a Type 4 REG who has executed a Power Purchase Agreement with the City of Morganton for delivery power with a term of five, ten or fifteen years, the Fixed Long-Term Rates, as outlined below, will be applied based on the type of renewable generation.
- For each Customer with a Type 4 REG who chooses to sell energy to the City of Morganton on an "as available" basis and executes a Power Purchase Agreement with a one year term, the Variable Rates, as outlined below, will be applied based on the type of renewable generation.
